

PROFESSIONAL SUMMARY

Java Backend Developer with 3 years of experience building enterprise-grade microservices and integration platforms that modernize legacy ERP workflows across NetSuite, SAP, and Dynamics 365. Proficient in Spring Boot, Quarkus, REST APIs, Apache Camel, Kafka, and Enterprise Integration Patterns, with a consistent record of accelerating release cycles, eliminating manual processes, and cutting engineering effort through reusable, scalable architecture

WORK EXPERIENCE

Siemens AMS

Software Developer I – Enterprise ERP Integration Platform

Noida, India

Nov 2023 – Present

- Achieved a **60%** cut in manual ERP data entry by architecting a bidirectional sync microservice across enterprise ERPs using established design patterns.
- Automated 20+ REST APIs and event-driven **Kafka/Camel** workflows across 4 enterprise ERP platforms, measured by a **~40% faster release cycle**.
- Integrated **NetSuite, Dynamics 365, SAP, and Brightly EAM** to automate procurement, inventory, and maintenance workflows using **GraphQL** queries against NetSuite APIs, and designed the relational schema for a new ERP-to-EAM integration.
- Designed and implemented **OAuth2-based JWT** authentication using a custom Camel interceptor, securing token generation and access across integration endpoints.
- Reduced connector effort by **35–45%** by architecting reusable adapter frameworks, and wrote unit/integration tests with **JUnit** and **Mockito** to reduce regression defects.
- Built a **React**-based dashboard for the Brightly ERP-to-EAM integration and data mapping flow, and used **Claude** and **GitHub Copilot** to accelerate debugging, documentation, and unit test generation.
- Collaborated across 6 engineering teams on **150+ PR reviews** (~30% faster turnaround) and authored **20+** architecture/troubleshooting docs, cutting repeat production issues **30–40%**.
- Prototyped generative AI-powered tooling (RAG-based documentation search, LLM-driven data extraction) to evaluate the applicability of **Spring AI** and **Claude API** within the ERP integration platform.

UBoard India

Data Analyst Intern

Gurgaon, India

Aug 2022 – Sep 2022

- Improved inventory forecasting accuracy by an estimated **15%** across **100+** retail outlets by analyzing retail datasets with **Python, Pandas, and NumPy**, and building forecasting/clustering models with **Matplotlib** and **Seaborn**.

TECHNICAL SKILLS

Languages: Java (17/21), Python, C++, SQL

Backend & Architecture: Spring Boot, Quarkus, Microservices, RESTful APIs, GraphQL, Swagger/OpenAPI, Contract-First API Design, Design Patterns, Idempotency, API Versioning, Apache Camel, Enterprise Integration Patterns, Distributed System Design

Generative AI: Spring AI, RAG, LLM APIs (Claude, OpenAI), Vector Databases (pgvector), Prompt Engineering, LangChain4j

AI-Assisted Development: Claude, GitHub Copilot (debugging, documentation, unit test generation)

ML & Deep Learning: TensorFlow, Keras, PyTorch, scikit-learn, BERT/Transformers, Time-Series Modeling (LSTM), Federated Learning (FedAvg)

Messaging & Async: Apache Kafka, asynchronous integration workflows

Scripting: Python and Bash scripting for development and operational tooling

Databases: PostgreSQL, MySQL, Hibernate/JPA, Liquibase

Security: OAuth2, JWT Authentication, API Security, HashiCorp Vault

DevOps & Version Control: Docker, Kubernetes, Grafana, Git, Gradle, Maven, CI/CD, JUnit, Postman, SonarQube

Practices: Agile/SDLC, Code Reviews, SOLID Principles, DevOps, OAuth2/JWT

ACADEMIC & APPLIED PROJECTS

Federated Time-Series Learning under Heterogeneous Clients – FedAvg, PyTorch | [GitHub](#)

Jun – Jul 2026

- Built a reproducible **FedAvg** pipeline with an **LSTM** classifier on the **UCI HAR** dataset, comparing **IID and subject-based (non-IID)** client partitioning across 5 communication rounds with unit-tested aggregation.

RAG-Based Enterprise Support Assistant – Spring Boot, Spring AI, PostgreSQL (pgvector), Claude API, Docker, Kubernetes | [GitHub](#)

Nov 2025 – Jan 2026

- Built a retrieval-augmented generation system with a hybrid **BM25 + vector search** pipeline to answer technical queries over ERP integration documentation, achieving **85% answer relevance** on a 50-question evaluation set.

LLM-Powered Data Mapping & Extraction Pipeline – Java, Spring Boot, Claude API, Kafka, JSON Schema, Docker

May 2026 – Jun 2026

- Built an LLM-powered extraction pipeline converting unstructured invoice/PO documents into schema-validated JSON with structured-output prompting, achieving **92% field-level extraction accuracy** on a 30-document evaluation set.

Sagacity – Python, BERT, NLP, Flask | [GitHub](#)

Sep 2023 – Jan 2024

- Integrated a **BERT**-based NLP model into a Flask backend achieving an **F1-score of 0.86**, and achieved peer-reviewed recognition (impact factor 7.17) by co-authoring and publishing the underlying research paper.

EDUCATION

ABES Engineering College, AKTU University

B.Tech in Information Technology

Aug 2020 – May 2024

CGPA: 7.91/10

CERTIFICATIONS & ACHIEVEMENTS

- Awarded the **Prime Minister's Special Scholarship Scheme (PMSSS)**, a Government of India merit scholarship selecting top-performing students nationwide, covering **INR 5,00,000** in tuition plus fully-funded accommodation.
- Earned Cisco Networking Academy's **Programming Essentials in Python** certification, validating core object-oriented programming principles that carry directly into Java-based backend development.
