

NISHTHA TIKU

+91 9906388942 | [Email](#) | [LinkedIn](#) | Noida, Uttar Pradesh

PROFESSIONAL SUMMARY

Java Backend Developer with 3 years of experience designing high-throughput, secure microservices and REST APIs within Service-Oriented Architectures. Skilled in Spring Boot, Kafka-based event-driven systems, and Redis caching for performance optimization, with a consistent record of applying TDD and OWASP security practices to enterprise-grade platforms. Experienced integrating and modernizing complex, multi-system architectures under real-world reliability and compliance constraints.

WORK EXPERIENCE

Siemens AMS

Noida, India

Software Developer I – Enterprise ERP Integration Platform

Nov 2023 – Present

- Cut manual ERP data entry by 60%, by architecting a bidirectional sync microservice enabling real-time data consistency across enterprise ERP systems.
- Accelerated release cycles by ~40%, by automating 20+ RESTful APIs and event-driven Kafka and Apache Camel workflows across 4 ERP platforms within a Service-Oriented Architecture (SOA).
- Eliminated manual procurement, inventory, and maintenance workflows across Oracle NetSuite, Dynamics 365, SAP, and Brightly EAM, by integrating the platforms and designing the relational schema for a new ERP-to-EAM integration.
- Mitigated common security vulnerabilities per OWASP Top 10 guidelines, by designing and implementing OAuth2-based JWT authentication through a custom Camel interceptor.
- Reduced regression defects and cut connector development effort by 35–45%, by following Test-Driven Development practices with JUnit and Mockito and building reusable adapter frameworks.
- Improved integration sync throughput and reduced redundant ERP calls, by implementing Redis-based caching for frequently accessed integration data.
- Cut repeat production issues by 30–40% and accelerated PR turnaround by ~30%, by collaborating across 6 engineering teams on 150+ pull request reviews and authoring 20+ architecture and troubleshooting documents.

UBoard India

Gurgaon, India

Data Analyst Intern

Aug 2022 – Sep 2022

- Improved inventory forecasting accuracy by ~15% across 100+ retail outlets using Python-based forecasting and clustering models (Pandas, NumPy, Matplotlib, Seaborn).

TECHNICAL SKILLS

Core: Java (8/11/17/21), Spring Boot, RESTful APIs, Microservices (SOA), Apache Kafka, Redis

Testing & Security: JUnit, Mockito, TDD, OAuth2, JWT, OWASP Top 10

Databases: SQL, PostgreSQL, MySQL, Hibernate/JPA, Liquibase

DevOps: Docker, Kubernetes, Git, Maven, Gradle, CI/CD, SonarQube

Generative AI: Spring AI, RAG, LLM APIs (Claude, OpenAI), pgvector, LangChain4j

Additional: Oracle NetSuite, Data Structures, Quarkus, Swagger/OpenAPI, Apache Camel, Enterprise Integration Patterns, HashiCorp Vault, Python, SOLID Principles, Agile/SDLC

ACADEMIC & APPLIED PROJECTS

RAG-Based Enterprise Support Assistant

Nov 2025 – Jan 2026

Spring Boot, Spring AI, PostgreSQL (pgvector), Claude API, Docker, Kubernetes

- Achieved 85% answer relevance on a 50-question evaluation set, by building a retrieval-augmented generation system with a hybrid BM25 + vector search pipeline over ERP integration documentation.
- Containerized and deployed the system using Docker and Kubernetes, with a Spring Boot service layer handling API orchestration and PostgreSQL-backed persistence.

LLM-Powered Data Mapping & Extraction Pipeline

May 2026 – Jun 2026

Java, Spring Boot, Claude API, Kafka, JSON Schema, Docker

- Achieved 92% field-level extraction accuracy on a 30-document evaluation set, by building an LLM-powered pipeline that converts unstructured invoice/PO documents into schema-validated JSON using structured-output prompting.
- Deployed the pipeline as containerized Spring Boot microservices communicating via Kafka, mirroring production-grade event-driven integration patterns.

Sagacity

Sep 2023 – Jan 2024

Python, BERT, NLP, Flask

- Achieved an F1-score of 0.86 and peer-reviewed recognition (journal impact factor 7.7), by integrating a BERT-based NLP model into a Flask backend and co-authoring the underlying research paper.

EDUCATION

B.Tech in Information Technology,

ABES Engineering College (AKTU University)

Aug 2020 – May 2024

CGPA: 7.91/10

CERTIFICATIONS & ACHIEVEMENTS

- Prime Minister's Special Scholarship Scheme (PMSSS) — Government of India merit scholarship, INR 5,00,000 tuition + accommodation.
- Cisco Networking Academy — Programming Essentials in Python.
